CONTURA
MOLD TEMPERATURE CONTROL

Hämmerstraße 6 · D-58708 Menden · Germany · Tel.: +49 2373 3964650 · contura-mtc.de

BOOST YOUR PROCESS!

提升您的生产工艺

EN CN

Improve the quality of your component with contour-following and optional variothermic temperature control:

- Reduced internal stress and distortion
- No visible joint lines
- High-quality surfaces (high-gloss, matted or textured)

通过可选变温控制和轮廓跟踪来提高产品品质。

- 减少内应力和变形
- 没有可见的结合线
- 高质量产品表面（高光、哑光或纹理）

Reduce cycle times and make your production process more efficient:

- Approx. 30% cycle time reduction
- Shorter process setup times
- Scrap reduction
- Possible elimination of coating processes

缩短成型周期和提高生产效率：

- 成型周期缩短约 30%
- 缩短工艺设置时间
- 减少瑕疵品
- 产品可免去涂层工艺

The sample component shown here has numerous potential problems. With CONTURA® know-how, they can be controlled and avoided.

Thanks to scrap reduction and, in particular, the possibility of eliminating unnecessary coating processes, our technology is a tool for you to significantly **reduce your CO_2-footprint**

此处显示的示例产品具有许多潜在的问题。凭借 康图拉 的专业知识，它们可以被管理和避免。

由于瑕疵品显著减少，以及免去不必要的涂层我们的模具可以显著减少C02排放
